Creating Wonder, Inspiring Hope
Together for Lung Health

experience an evening of inspiration

Join us in **creating wonder, inspiring hope, together for lung health.**

Community leaders, healthcare professionals, and passionate, generous individuals will celebrate progress through research, and knowledge.

OUR MISSION help support lung health.

At the BC Lung Foundation, our mission is to improve lung health and support people who live with lung disease. We rely on the generosity of businesses like yours to help us achieve this goal.

This year, our annual gala, Wonder for Lung Health, is dedicated to raising essential funds to support an urgently needed project.

proceeds from the evening will support carter's project.

An initiative in honor of Carter Vigh, a nine-year-old boy who lived bravely with asthma – and died this summer, due to poor air quality in 100 Mile House. The nearest air quality monitoring station was 100 km away; the skies were clear, but the air over 100 Mile was, invisibly, very poor. His parents did everything right when his asthma attack occurred, but the local hospital was unable to save him.

Carter's Project will fund the free distribution of air quality monitors throughout British Columbia, in honor of him as well continue to increase the scope of Carter's Project.

make a
difference
for
the 1 in 5
living with
lung disease

Donate: unique items or experiences to our silent auction. Your donation will be featured and recognized at the gala, in promotional materials, and on our website.

Sponsorships: tailored to your business's needs. Gain visibility, build brand reputation, and align with the BC Lung Foundation to make a lasting impact on your community – and communities throughout the province.
